

# CLINICAL AND LABORATORY PROCEDURES FOR GNATHODONTICS' MILLED BARS

## CLINICAL AND LABORATORY PROCEDURES FOR GNATHODONTICS' MILLED BARS.

### APPOINTMENT #1

**Doctor:** Upper and Lower preliminary impressions and study cast of existing appliance. Order impression copings\* for final impression.

**Lab can order impression copings if requested.**

### APPOINTMENT #2

**Doctor:** Final impression using custom tray (open top); choose final shade and mold of denture teeth.

**Lab:** Pour master cast with soft tissue insert; fabricate verification jig. Fabricate screw retained occlusal rims for jaw relations records.

### APPOINTMENT #3

**Doctor:** Try in verification jig and check for fit, (*single screw test*). Section & index if needed. Take jaw relation marking midline, high smile, etc.

**Lab:** Set-up denture teeth on screw retained baseplate.

### APPOINTMENT #4

**Doctor:** Try in set-up and take a check bite for lab remount prior to processing. Verify esthetics, phonetics, tooth color, midline, etc.

**Lab:** Fabricate Hybrid Bar and set teeth on bar (or set teeth to CrCo subframe for Bar Overdenture designs).

### APPOINTMENT #5

**Doctor:** Try in CAD/CAM bar with teeth in wax (final try-in). Take check bite if needed.

**Lab:** Process for final delivery.

### APPOINTMENT #6

**Doctor:** Deliver final prosthesis.
