

# Digital Dentistry Implant Workflow for Specialists to Restorative GP's

Presented by David Marten, Digital Dentistry Specialist  
Thursday, April 13, 2023 • 1 CE Credit Hour

## COURSE DESCRIPTION

Implant dentistry is evolving rapidly due to digital technology. This lecture will focus on ways a digital workflow can enhance communication between the specialist, restorative doctor and lab, thereby improving safety, accuracy and efficiency in implant dentistry. This presentation will encompass digital impressions, guided surgery, and immediate temporization techniques to enable final prosthesis predictability.

## LEARNING OBJECTIVES

- Discuss CBCT technology and its incorporation into implant treatment planning
- Review restorative options, custom abutments, milling
- Discuss digital impression systems for final implant restoration
- Increase case acceptance
- Discuss how information from both digital systems can be merged for surgical guide and immediate temporary restoration fabrication

## David Marten

David Marten is the Digital Workflow Manager for BioHorizons Implant Systems where he supports the implementation of digital technology for implant planning, placement, and restorative solutions throughout North America. Mr. Marten has been using digital technology in dentistry for the past 15 years. He has a B.S. in Materials Engineering which has complimented his experience in implant dentistry. In the past 10 years, Mr. Marten has held positions such as CAD/CAM Regional Manager, Guided Surgery Specialist, and most recently Digital Workflow Manager. He has had the opportunity to work closely with hundreds of clinicians and labs in many different markets to utilize digital workflows.
